

ENVIRONMENTAL POLICY STATEMENT.

OUR AIMS

Carbis Filtration Limited's aims and objectives are a commitment to continual improvement through constant review, in order to provide an effectively controlled environmental management system and service. Objectives and targets are set and then reviewed by management at regular and designated intervals.

Our aims include:

- ***Prevention of pollution.***
- ***Controlling and reducing emissions to the environment.***
- ***Focusing on energy consumption, with view to reducing depletion of natural resources.***
- ***Recycling materials and by-products and the use of recycled materials.***
- ***Complying with legislation regulations & relevant Codes of Practice at all times.***

TAKING OWNERSHIP FOR YOUR PROBLEMS.

We have developed an Environmental Management Programme to identify, then control aspects. We adhere to legislation, regulations, Codes of Practice and other requirements at all times. Where no laws, regulations or Codes of Practice exist, we have developed our own standards to allow for best, practicable, environmental option. The systems work to the principles of BSEN ISO14001.

We have included within our system measures to control abnormal and emergency situations. It is our aim to consult and communicate our policy with our Clients and their representatives, our contractors, our suppliers and all persons working for or on behalf of our company, to promote environmental awareness and to gain their support to meet our aims.

WORKING TOGETHER TO SUCCEED.

We have an environmental representative for the organisation but also employ a consultant to assist with environmental and quality matters. We will consult Local and National Government bodies, enforcing and regulatory authorities, and specialists to seek advice and assistance towards achievement of our Environmental Management Programme to it's full potential. Where no laws, regulations or codes of practice exist, we will develop our own standards to allow for the best practicable and financially viable environmental option, not entailing significant and detrimental costs to the company. We will consider public, local and interested parties opinions when making decisions.
